Dear Sir or Madam,

We are happy to acknowledge UNDICOM designed our website and programmed it. Not only is the website designed professionally but also includes some tools for additional modifications to be done by BAPis as a customer.

We emphasize the fact that UNDICOM reacts promptly to change requests and necessary adaptations. Furthermore we have been shown great cooperativeness not only for designing our website as good as possible but also for the entire necessary environment, like professional pictorial design, evaluation tools etc.

After activation of our newly designed website we noticed a definite gain of enquiries from all over the world. This exactly was our primary objective and we already now are benefitting. For the future we project a further extension of establishing contact to our existing as well as to new potential customers.

On the basis of our experience with UNDICOM until now we highly can recommend the services of this company.

Best Regards,

Dr.-Ing. Peter Bonk
CEO

Nico L. Runge
